

BENEFITS OF

Meraki

HOW CAN IT HELP MY BUSINESS TRANSFORMATION

Here are the most compelling reasons to make the move to Cisco Meraki. From the ease of management to full scalability, Meraki is the right choice for your modern organisation.

The time to change is now, according to Cisco. The pace at which businesses are adopting digital technology in the wake of the pandemic is staggering.

77% of CIOs said that digital transformation was in their top budget priority for 2021 and

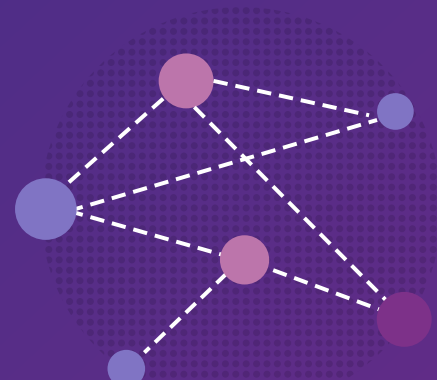

89% of businesses planned to adopt a digital-first strategy going forward. And Meraki might be the key to that digital approach.

INTRODUCTION TO MERAKI

100% cloud managed Cisco Meraki provides a full-stack portfolio covering all your network infrastructure and security needs including switches, routers, wireless access points, firewalls, security cameras, and communications hardware.

HOW CAN MERAKI HELP YOUR BUSINESS?

Powerful switching designed for Intent Based Networking

SD-WAN with secure auto VPN and threat intelligence

High-capacity WiFi with automatic RF optimisation

Systems Manager to centrally provision, monitor and secure endpoints

Meraki Insight for swift identification and resolution of network user experience issues

Intelligent smart cameras with extensive feature set as standard

BUSINESS BENEFITS

1 EASY INSTALLATION, MIGRATION, AND SCALABILITY

Out of the box Meraki can be up and running on a network within minutes. And since Meraki is fully cloud supported, it's easy to scale up or down as you need to and meet changing business demands.

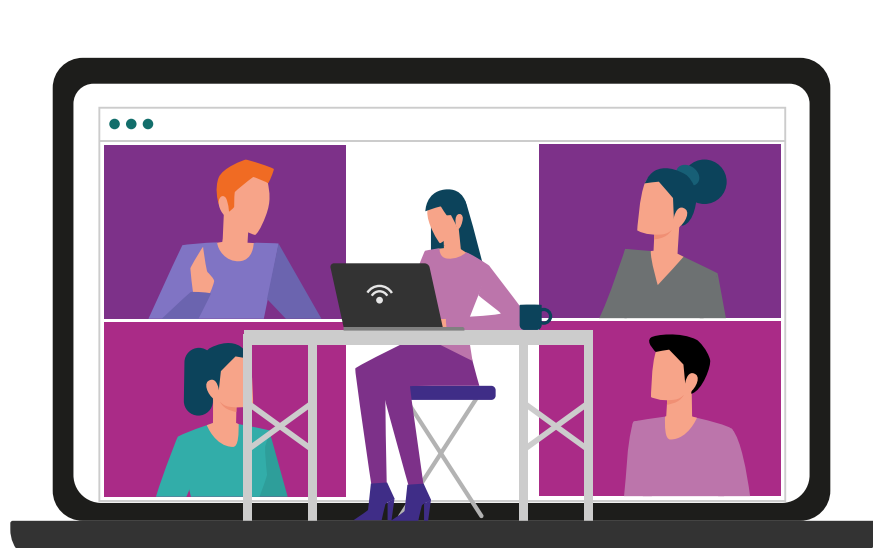

2 ONE MANAGEMENT DASHBOARD

No longer are your IT teams required to log into different interfaces to manage your setup. Meraki is managed via a single dashboard, an intuitive, feature-rich interface that enables organisations to rapidly roll out digital initiatives, delivering business value.

3 REMOTE-FRIENDLY WORKING

Meraki enables hybrid and remote working. Sites and preferred connectivity are easily configured, while AutoVPN builds secure IPsec tunnels without the need for specialist IPsec knowledge. This means better security is baked in across several sites or across the globe.

4 BETTER SECURITY

The Meraki suite includes a range of top-shelf security features. These include:

- Anti-virus and anti-phishing
- Advanced malware detection
- Content filtering
- Intrusion prevention
- Enhanced firewall tools
- Smart cameras with motion search

5 FULLY REGULATION COMPLIANT

If you're working within heavily regulated industries, you'll find Meraki always stays up to date. With push patches and updates, maintain strict accounting, ISO and GDPR compliance with full documentation provided. This also includes provisions for Bring Your Own Device and guest environments.

If you're looking to push forward with a ground-breaking business transformation, **talk to a member of our team today.**
