

## DARK WEB MONITORING SERVICE

The number of stolen usernames and passwords in circulation on the dark web has increased by 300% since 2018. There are now more than 15 billion of these stolen credentials, from 100,000 data breaches, available to cybercrime actors.

### Service Description

By monitoring the dark web for threat intelligence about stolen user data associated with your company's domains, you can be alerted when a compromise is detected, then respond to stop a potentially costly and widespread data breach.

Phishing accounts for 90% of data breaches. Our Premium Service runs simulated phishing attacks and security awareness training campaigns to educate employees and provide a picture of your company's security posture and potential risks.

### Scope

We provide 365, 24/7 dark web monitoring that will alert you when there are signs your employees' credentials have been compromised.

Alerts provide mail addresses and passwords where available, plus any Personally Identifiable Information (PII).

A monthly report details all the previous month's compromises.

### Premium Service?

With an ever-changing threat landscape, it's important that employees are exposed to the latest phishing traps set by criminals.

Our platform is regularly reviewed to provide the most up-to-date phishing scams, including COVID-19 scams referencing Sharepoint and LinkedIn or PayPal fraudulent activity.

Our Premium Service complements the Dark Web Monitoring Service with simulated phishing attacks and security

awareness training campaigns to educate employees, thus helping improve defence against cybercrime.

### Are You Compromised?

Contact your Account Team today and find out how to receive a free dark web live data search of your domain.

### Cost

Pricing is based on two tiers. A standard Dark Web Monitoring Service offers automated alerting on any domain e-mail compromises. Our Premium Service offers all the benefits of our standard service, plus phishing simulation and training.

## START YOUR JOURNEY

Start your journey today by contacting your account manager or [hello@thisiscae.com](mailto:hello@thisiscae.com).

### Journey

Security requires a multi-layered approach. Our Dark Web Monitoring Service helps you visualise the larger security picture and benefit from additional conversations about securing your infrastructure and data.

Technology can be used to help your business compete in ever more challenging environments. The range of services and solutions delivered by CAE are offered to help you drive your organisation forward.

Through our commitment, agility and energy we aim to earn the trust and loyalty of our customers, partners and employees, making us the best choice for delivering technology services and setting the standard that others aspire to.
