

Envision a Safer, Smarter Store

WITH INTELISITE'S SOLUTIONS FOR RETAIL

HELPING RETAILERS GET BACK TO WORK AND KEEPING CUSTOMERS SAFE

IntelliSite's AI enabled IoT solutions can help retailers like you achieve amazing things - from improving customer experience, improving efficiency and understanding your customers to keeping your employees and others safe during a pandemic. It all begins with cameras, sensors and IntelliSite's unique software - IntelliCore. Together, IntelliSite provides end-to-end solutions customized for your retail environment and your goals.

SOLUTION BENEFITS

Occupancy Management

Mask Compliance

Thermal Screening

Centralized Management + Alert Screening

Employee Bar Code Scanning

Curbside Pickup Optimization

Instore Analytics

Security + Safety

Integration with 3rd party services

HBM SOLUTIONS FOR THERMAL SCREENING, CDC COMPLIANCE AND MORE

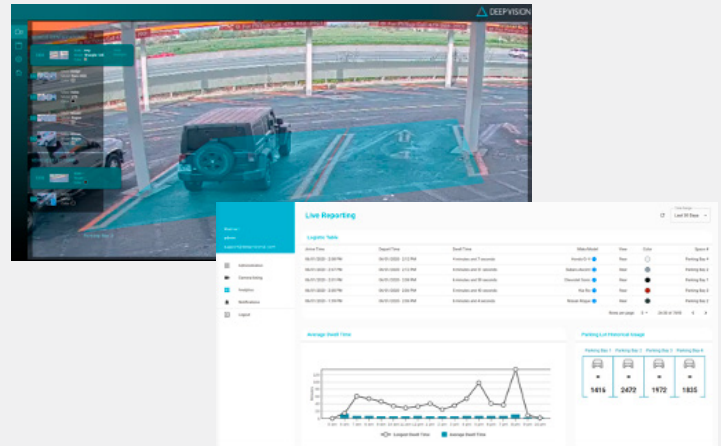

Manual temperature screenings at entrances can cause bottlenecks for shoppers at store entrances and take valuable human resources to man. Now with IntelliSite’s hBM solutions, customers and employees can be scanned “in motion” with artificial intelligence enabled accuracy. * IntelliSite’s hBM Kiosk for employers is an agile mobile solution customized to:

- Take contactless thermal readings of customers and employees
- Integrate with internal time management and HR systems
- Scan barcodes on employee badges
- Perform daily CDC self screening
- Facilitate building occupancy management

CURBSIDE PICKUP OPTIMIZATION

Keep pickups moving and minimize customer wait times and create a smooth and seamless customer experience. Our IntelliSite retail solution:

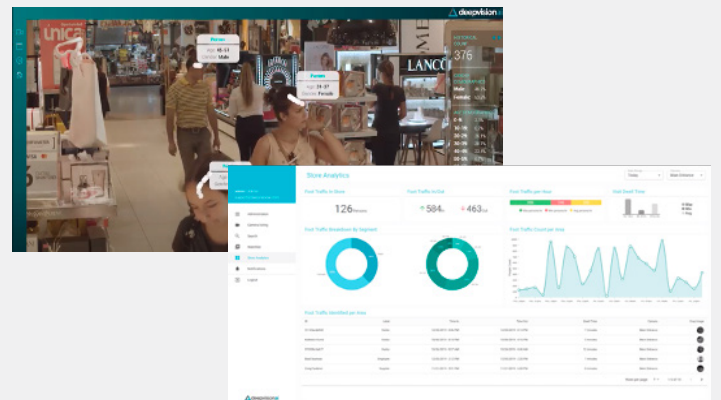

- Identify customers through vehicle recognition,
- Notifies associates when the customer parks in bays
- Measures time spent to service,
- Provides insights for current service time, pick up area utilization and customers at attrition risk
- Initiates an escalation process if customer dwell time exceeds a preset threshold
- AI customer identification & auto check-in for curbside pickup requiring no app or phone call

INSTORE ANALYTICS

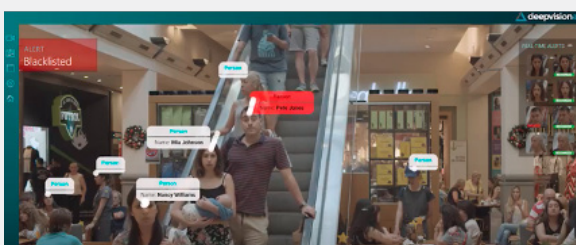

Imagine having in-store analytics as rich and robust as your online store analytics. Now it’s possible with IntelliSite’s retail solution:

- Occupancy Management - Quantify in-store foot traffic
- Keep Business Flowing - Create alerts for associates by target store areas when customer waiting times exceed preset thresholds. Great for cashier lines, counters, returns areas, etc.
- Increase Impulse Buys - Stock shelves more scientifically, using Heat Mapping to identify high traffic areas within your store
- Know your customer - Segment customers to understand the changing demographics
- CDC Compliance - Occupancy management, thermal screening reports, mask verification and compliance

SECURITY AND SAFETY

Prevent security threats and raise alerts based on early customer identification such as blacklisted vehicles entering a parking lot or people walking into a store.

- Early identification and alert on blacklisted vehicles entering a parking lot or people walking into a store.
- Slip and fall detection to avoid lawsuit
- And more
